You are highly qualified and would like to work in GERMANY?

The International Placement Services (ZAV) are member of the European Employment Services network EURES – We place our services at your disposal without charge!

We are looking for an IT SOLUTION CENTER MANAGER (M/W) in Würselen in the region NORTH RHINE- WESTPHALIA

North Rhine-Westphalia is a diversity state, where industrial and rural regions lie very close to each other. Discover the metropolitan area in the heart of Europe, with a strong economy and countless leisure time facilities. NRW is thrilling! www.land.nrw

Your profile:

- BS and MS in Computer Science & Electrical Engineering
- Very good English skills, **German is not mandatory**
- Minimum 5+ years in development, R&D, & leadership experience.
- Minimum 3+ years in a platform and/or infrastructure product manager role or engineering manager/director role. Global development experience required.
- Strong know-how and experience with virtualization technologies and products.
- Must have experience in building solution offerings and reference architectures/designs from inception to broad successful customer / field adoption.
- A track record for managing/directing people designing and applying both best-of-breed and “home grown” solutions to meet business objectives on large-scale technology projects.

Your main functions:

- Drive industry leading hybrid and private cloud solutions by integrating with well-known virtualization technologies (such as VMWare, Microsoft, and OpenStack) based on QCT's data center offerings.
- Design and develop reference architecture and solution white papers.
- Define and drive innovative use cases with emerging / leading technologies from QCT
- Liaison with potential and existing customers, participating in customer meetings and presentations, proof of concepts (PoCs), and demos.
- Create and present technical presentations to customers and partners, and gather feedback to influence
- QCT product and solution offerings.

Your knowledge:

- Understand all aspects of virtualized cloud computing solutions (VMWare, Microsoft and OpenStack)
- including software defined storage and software defined network.
- Strong leadership, communications, and negotiation skills to find creative and effective solutions from QCT and partners.
- Understand industry trends in cloud computing, IOT, Big Data and challenges of large-scale systems.

The employers will support your first steps in NRW with relocation services, e.g.:

- help in finding accommodation
- support with administrative tasks
- a mentor in the enterprise

A first job interview is possible via Skype/ telephone.

Software Developer in various C/C++ (among others)

Our company develops and produces high-quality infotainments and assistance systems for automobile producers and holds competences in the fields of car infotainment, automobile interconnectedness and telematics, as well as in navigation and radio and television turners. With development sites in Shanghai and San Carlos we are one of the worldwide top addresses!

For the accomplishment of our goals and tasks we are searching for several software developers (m/f) working in different fields of activity to strengthen our automotive team.

Job description:

- Development of several features (for instance HMI, interactive voice response for in-vehicle connectivity such as Apple CarPlay, Google AndroidAuto, MirrorLink, BT-Telephony, Connection via 3G/4G, Bluetooth, WiFi & USB, OnlineServices, Firewall/Security, SocialNetworks, Car2X)
- Implementation of UI-renderers, animators and spellers, of operational concepts, test systems and test automatization and of various software solutions for media and audio apps for the application in future automotive infotainment systems
- Connection and implementation of different software components
- Software development in C/C++ or Assembler for Embedded Systems
- Utilization of technologies such as OpenGL ES, JNI, JavaScript-C++-Binding
- Creation of tests (unit, software integration and software) for the developed softwares
- Analysis, evaluation and coordination of client requirements
- Analysis and processing of fault tickets
- Technical coordination with deliverers and partners

Your profile:

You fit our team if you

- hold a master's degree preferably in informatics and communication technology or similar, a bachelor's degree with several years of correspondent professional experience or a technical degree
- have good C/C++ knowledge and good knowledge in the field of software development
- have good knowledge of Java or HTML5 and/or LINUX/UNIX/QNX or similar (desired)
- speak good German and very good English
- are distinguished through autonomous and self-dependent work and a high level of flexibility
- take pleasure in creative work and are highly interested in innovative technologies in "Human Machine Interface".

We offer:

- An attractive and diversified job in a dynamic atmosphere with the perspective of sustainable personal development
