

Technical details of the project, general
 The project details the structure of the Lamborghini brand, providing a high level of integration between technical and architectural. The structure is modular, composed of concrete, structural steel, and glass, with a central tower and a base of faceted support. The building is designed to be a landmark in the landscape, with a unique form and a high level of technical integration.

Construction rules
 The base of the building is a circular form, with a central tower and a base of faceted support. The building is designed to be a landmark in the landscape, with a unique form and a high level of technical integration.
