capsule

It is a living unit designed to meet the minimum living needs within the future scenario, which is fed from the changing life dynamics after the pandemic.

Project: "Capsule"

Capsule is a living unit designed **to meet the minimum living needs** within the future scenario, which is fed from the changing life dynamics after the pandemic.

+ The capsule will be designed for a single person to survive for a temporary period of time.
+ Under what conditions and by whom the capsule will be used, the life functions that will take place in it, its context (land, air, water, etc.), size and material will be specified in the life scenario to be prepared.
+ The project will be developed in **groups of 2 people**.
